

# Course Navigation

#	Name	Description
1	<b>Course Navigation</b>	The Course Navigation links help you get where you want to go within a LearningZone course. Instructors can customize the links shown in a course; if you don't see links that display in other courses, your instructor has hidden them from your view. The active link is highlighted in white with a blue background. This helps you quickly identify the feature area you are currently viewing.
2	<b>Breadcrumbs</b>	The breadcrumbs leave a trail to show where you are inside the course. Follow these links backward to visit prior course content.
3	<b>Content Area</b>	This area displays the content of the course.
4	<b>Sidebar</b>	The Sidebar helps you see what you need to do next in your course. The <b>To Do</b> list shows assignments you need to turn in. Items remain in this section for two weeks. The <b>Coming Up</b> list shows assignments and events coming up in the next seven days. The <b>Recent Feedback</b> list shows assignments with feedback from your instructor.
